PROFESSIONAL SUMMARY

Full-Stack Developer with production experience resolving critical bugs and building scalable, responsive web applications for educational and enterprise systems. Contributed to multiple live production platforms, developing landing pages and resolving UI/UX issues across React, Next.js and TypeScript codebases. Experienced with Spring Boot and modern frontend frameworks, with hands-on experience in full-stack development within React and Node.js ecosystems. Proven ability to work in Agile teams and deliver under tight deadlines. Actively developing cutting-edge AI applications while maintaining a strong academic record.

EDUCATION

B.Sc. (Hons) in Electronics and Computer Science

University of Kelaniya, Sri Lanka | Expected Graduation: March 2026

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Web Technologies, Software Engineering

G.C.E. Advanced Level — Physical Science Stream

Dharmaraja College, Kandy 2018

Subjects: Combined Mathematics, Physics, Chemistry

PROFESSIONAL EXPERIENCE

Intern Software Engineer

Cenzios (PVT) Ltd | Sri Lanka | Remote | Sep 2025 – Mar 2026

- Designed and built the Voyage Tourist Cab Booking System backend using NestJS — modular architecture, RESTful APIs, JWT authentication, and PostgreSQL integration.
- Integrated Next.js frontend for the Voyage platform with dynamic routing, React Query-powered API calls, and responsive Tailwind UI components.
- Implemented responsive frontend features and resolved critical UI rendering bugs for the SaaS Payroll platform (Dual Admin & User Portals) using React, TypeScript, and Tailwind CSS — accelerating feature delivery and improving client-side dashboard interactions.
- Refactored core features in the SNP Holdings system (React.js + Node.js/Express), eliminating 3 critical UI bugs reported in production and improving component render efficiency.
- Built and deployed production-ready landing pages for 5 products (SNP, Cenzios Learning, CERT, Payroll, InterviewPro) using Next.js and TypeScript.
- Contributed responsive UI fixes and Shadcn/ui component enhancements to Travora 2.0 tourism platform, ensuring consistent mobile-to-desktop breakpoint behavior.
- Participated in daily standups and bi-weekly sprint planning (Agile/Scrum), consistently meeting sprint goals; conducted peer code reviews maintaining team code quality standards.
- Managed feature development across multiple Git branches, resolving merge conflicts and maintaining clean commit history across a team of 6 engineers.

Tech Stack: React, Next.js, TypeScript, Redux Toolkit, React Query, Tailwind CSS, Shadcn/ui, Node.js, Express.js, Nest.js, Go (Gin), PostgreSQL, MongoDB, Docker, Git

PERSONAL PROJECTS

SiteForgeAI – AI-Powered Website Builder | Ongoing | Jan 2026 – Present

- Developing an interactive visual editor with real-time UI customization and version control, enabling seamless project iteration and rollback
- Integrating Stripe payments with secure webhooks for a scalable credit-based subscription model
- Architecting a scalable backend using Node.js, Express, Prisma ORM, and PostgreSQL (Neon) with secure session-based authentication

GitHub: github.com/chamithsandeepa/SiteForge-AI

Tech Stack: React, TypeScript, AI APIs, Tailwind CSS, PostgreSQL, Better Auth UI

MindSketch – AI Text-to-Image Platform | Jul – Aug 2025

- Engineered full-stack AI platform integrating Stable Diffusion XL Base 1.0 via Hugging Face API, processing image generation requests with custom prompt optimization
- Implemented secure credit-based payment system using Stripe API with session management, webhook verification, and transaction logging
- Built responsive UI with real-time image preview, download functionality, and user gallery featuring infinite scroll pagination

GitHub: github.com/chamithsandeepa/mindsketch

Live Demo: <https://mind-sketch-nine.vercel.app/>

Tech Stack: React, Tailwind CSS, Node.js, Express.js, MongoDB, Stripe API, Hugging Face API, JWT Authentication

Ware-Wise – Full-Stack E-Commerce Platform | Mar 2025 – Jan 2026

- Integrated and deployed a **production-ready full-stack e-commerce application** with separate User and Admin interfaces using React, Node.js, Express, and MongoDB Atlas
- Implemented secure JWT authentication and integrated Stripe payment gateway for protected user access and real-world checkout processing
- Built **RESTful APIs** for product management, cart synchronization, and order processing, with cloud media handling via Cloudinary
- Deployed frontend on **Vercel** and backend on **Render**, ensuring responsive UI, SPA routing support, and environment-based production configuration

GitHub: github.com/chamithsandeepa/ware-wise

Live Demo: <https://warewise-ud1f.vercel.app/>

Tech Stack: React, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, Cloudinary, Stripe API

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Java, HTML, CSS, SQL
- **Frontend Technologies:** React, Next.js, Tailwind CSS, Shadcn/ui, Ant Design, Framer Motion, Responsive Design, CSS Grid/Flexbox
- **Backend Technologies:** Node.js, Express.js, NestJS, Spring Boot, RESTful APIs, JWT Authentication, Microservices Architecture
- **Databases:** MongoDB, PostgreSQL, MySQL — query optimization, schema design, Prisma ORM
- **DevOps & Cloud:** Docker, Git/GitHub, Vercel, Render, Postman
- **Development Practices:** Agile/Scrum, Code Review, Bug Fixing, UI/UX Enhancement, Performance Optimization, SEO Best Practices, Version Control

CERTIFICATIONS

- Cloud Computing for Absolute Beginners – DevOps Academy (2024)
- Introduction to Cloud 101 – AWS (2024)
- Introduction to Java – Sololearn (2024)
